

EK2000

Desktop Integration – Multifunctional Keyboard

Control all your workstations with a single keyboard and mouse.

Enjoy the benefits of an efficient and ergonomically designed workplace.

Customize the EK2000 with proprietary keypads and a variety of other modules.

Description

WEY Technology develops keyboards like none other in the world.

The EK2000 Keyboard enables users to control up to 6 workstations with a single keyboard and mouse, and just one press of a button.

The EK2000 is modular in design and can be configured to meet individual user, hardware and application requirements.

An array of interfaces (PS2, USB and serial) and platforms (PC, SUN, etc.) are supported.

Application licenses and workstations can be shared between two or more keyboards and users.

Keyboard functionality can be further enhanced to display video signals on selected desk monitors by adding a Video Deskswitch or Deskswitch KMVA.

Highlights

- **Control up to 6 workstations with a single keyboard and mouse.**
- **Reduce costs for market data and licenses by sharing services between 2 users**
- **Wide range of PC emulations supported: Bloomberg, SUN etc.**
- **Expandable functionality with customized modules and keypads**
- **Multiple interfaces ensure full flexibility in diverse environments**

Features

Select PC or service

Only one keystroke is necessary to select one of the local workstations.

Share workstations

Linking two keyboards together enables the sharing of multiple workstations between two users.

Flashing LEDs indicate the active and in use status of shared PCs.

Extended sharing

With a WEY Microsystem or Deskswitch KMVA 4x4/8x8, up to 8 workstations can be shared among 8 users.

Audio

Audio signals can be routed to either integrated or external speakers, or a headphone set connected to the keyboard.

Expandable functionality

The keyboards have programmable function keys and keypads, which can be configured with specific hot key functions and strings.

Functionality can be further enhanced with accessories such as proprietary keypads, Video Deskswitches and Microsystems. Additional modules can be developed upon request.

Accessories

Keyboards can be customized with accessories to suit your specific needs:

Keypads

Multiple keypads are available such as SUN, Bloomberg, etc.

Connector Box

The WEY Connector Box is a central interface to connect workstations and other devices to the keyboard.

Video Deskswitch 2/1 DVI

In combination with the keyboards, switch video signals from two workstations to the monitors by using the 2:1 Video Deskswitch. Analogue and digital signals are supported as input and output signals.

Deskswitch KMVA or Microsystem

Extend the sharing range to a maximum of 8 KMVA (Keyboard, Mouse, Video, Audio) sources and workplaces with the WEY Deskswitch or Microsystem.

Deskswitch KMVA 4x4

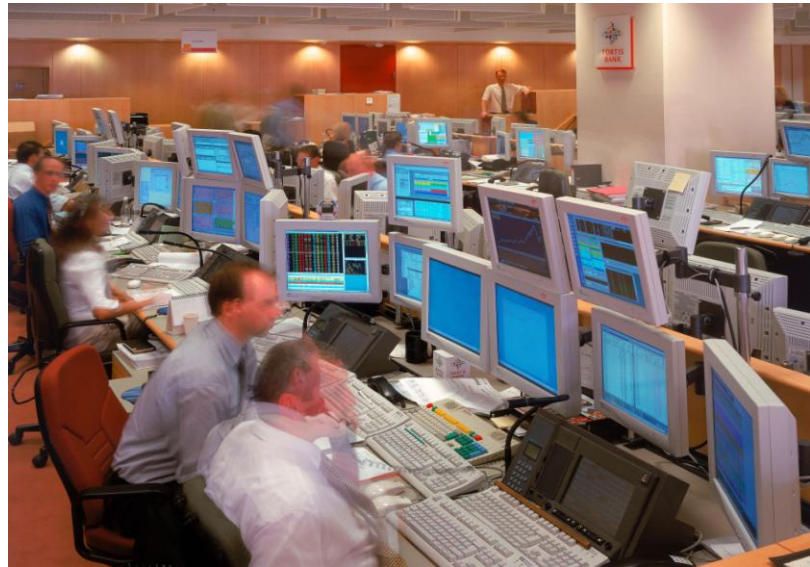

Deskswitch KMVA 8x8

Microsystem

Enhance efficiency and clear the clutter from your desk by replacing multiple keyboards ...

... with a single multifunctional WEY Keyboard.
