EK LIGHT

Desktop Integration – Multifunctional Keyboard

Intuitive control of multiple workstations with a single keyboard and mouse. Enjoy the benefits of a cost-effective, efficient and ergonomic workplace. Enhance control and profitability by sharing services among desks.

Keyboards that write history.

Description

WEYTEC develops world class keyboards which are second to none. The EK*light* is the flexible model for cost-sensitive environments. Access up to 4 workstations without performance loss using a single keyboard and mouse. The EK*light* is modular in design and can be configured to meet individual user, hardware and software requirements.

The multifunctional keyboard is characterized by its adaptability. All platforms are supported, and customized accessories ensure the optimal management of your business processes.

In combination with switching solutions such as the WEYTEC distributionPLATFORM, workstations can be shared between users for more efficiency, profitability and control.

Features

Functionality and Ergonomics

The EK*ligh* offers almost unlimited functionality and an intuitive user interface. Selecting the active computer is very simple. A single keystroke suffices, and the desired source appears on the screen and is at the user's control. Due to the modular architecture and programmable function keys and keypads, the keyboard can be readily customized to meet individual software and hardware requirements. A variety of interfaces (UBS, PS/2, serial, etc.) as well as multiple platforms for trading floors and control rooms (Reuters Dealing 3000, EBS, Reuters Eikon, Bloomberg, diverse Control Systems) are supported. Audio signals can be routed to either integrated or external speakers, or a headphone set connected to the keyboard.

Shared use of sources

Link 2 keyboards together with a serial cable to share and control multiple workstations between 2 users. Access and priority rights are managed in the user profiles.

Accessories

Keypads

Multiple customized keypads are available for market data services and control systems, etc.

Multifunctional Cable

 The multifunctional cable offers the following connections for peripheral interfaces and devices: 4x Audio, 4x USB, 1x PS/2, 2x RS232 (Share Port). A Connector Box is not necessary..
