

MK06 / WEY RAY 06

Desktop Integration – Multifunctional Keyboard

Intuitive control of multiple workstations with a single keyboard and mouse. High performance workplaces with maximum security, efficiency and control.

Description

WEYTEC develops world class keyboards which are second to none. The MK06 Multifunctional Keyboard offers uncompromising functionality and ergonomics. Access up to 16 workstations without performance loss using a single keyboard and mouse. The keyboard is characterized by its adaptability. All platforms are supported, and customized accessories ensure the optimal management of your business processes. In combination with the WEYTEC distributionPLATFORM, workstations can be shared among users for more efficiency, profitability and control.

Features

Functionality and Ergonomics

The MK06 offers almost unlimited functionality and an intuitive user interface. Selecting the active computer is very simple. A single keystroke suffices, and the desired source appears on the screen and is at the user's control. Up to 96 individually programmable functions can be stored on the function keys on the integrated color LCD. Due to the modular architecture, the keyboard can be customized to meet individual requirements. A variety of interfaces (PS/2, USB, serial, etc.) as well as multiple plat-forms for trading floors and control rooms are supported. Audio signals can be routed to integrated speakers or a headphone set.

Security and availability

The entire keyboard configuration is saved as a backup on the Connector Box. The WS keys are password protected for maximum security and availability.

Multiple user access to sources

Link keyboards together with a serial cable to share workstations between users. The active status is displayed via LEDs. Access rights are managed by individual user profiles.

Accessories

Keypads and Touchpads

Multiple customized keypads are available (e.g. for building control, trading platforms SUN, Dealing 3000, Bloomberg, etc.) – and more according to your specific needs. Enjoy maximum flexibility with the touchpad specifically developed for the MK06 and WEY RAY 06 Keyboards. The touch sensitive display can be integrated in the right or left side of the keyboard and provides an intuitive and freely programmable user interface.
