SENIOR TECHNICAL PROJECT MANAGER

Location: Washington, D.C. Area/Remote

Become part of our team

A career at WEYTEC means that you work for a manufacturer and international provider of KVM and visualization solutions for trading and control rooms.

Work with us to create a perfect working environment for our customers where first class service and reliability are paramount.

WEYTEC is a globally operating technology company. It has 14 companies worldwide and operates with local business partners in more than 45 countries. WEYTEC specializes in high-tech, innovative KVM and content visualization technology for integrated workplace solutions on trading floors and control rooms.

Working as a part of WEYTEC Americas, based in Washington D.C., you would be part of a family oriented, agile team of talented professionals working together to design, build, implement, and support WEYTEC's smart solutions. As a senior technical project manager, you will become a key resource in WEYTEC's operations and have unique opportunities to be the lead at the forefront of large multi-million-dollar prestigious projects.

Responsibilities

- Lead and manage multiple technical projects, ensuring they are completed on time and within scope.
- Analyze project requirements and develop detailed project plans that outline tasks, timelines, and resource allocation.
- Develop and implement scalable processes and workflows to enhance project management efficiency, ensuring consistency, clarity, and alignment across teams
- Manage order procurement and coordinate logistics to ensure timely delivery
- Assist BD & sales team as and when needed
- Assist with on-site installation, training and servicing of WEYTEC systems as and when needed
- Assist in staging, preparation, and support for projects as and when needed
- Travel up to 50% including the possibility for international travel
- Must be a team player

Basic Qualifications

- 5+ years project management experience in technical environment
- Knowledge and working experience with project management methodologies or software
- Familiarity working with computer hardware or hardware-based product solutions
- Understands basic networking terminology and protocols
- Security clearance is a plus

Preferred Qualifications

- Excellent communication skills - written and verbal
- Detail oriented
- Punctual and accountable
- Self-starter with abilities to establish priorities, work independently, and proceed with objectives without supervision
- Previous experience in delivering technical projects in control room or audio-visual markets
- Project management certifications are a plus
